b) Approaches in Social Banking.

5. a) Role of Technology in Social Banking.
b) Recent trends in Social Banking.

(507BCO21)

ASSIGNMENT-1

B.A.(Computer)&B.COM(Computer) DEGREE EXAMINATION, SEPTEMBER-2024

Third Year - Fifth Semester

Computer Applications

Paper VI – BIG DATA ANALYTICS USING R

MAXIMUM MARKS-30

ANSWER ALL QUESTIONS

1. Explain the classification of data based on its nature.
2. Discuss major challenges associated with big data analytics.
3. Define what is NOT considered as big data analytics. Explain two scenarios or types of data analysis that do not fall under the realm of big data analytics.
4. Define big data analytics and provide two key characteristics that differentiate it from traditional analytics approaches.
5. Provide an example of how to install and load a package in R. Provide two examples of popular R packages.
6. Discuss the concepts of arrays, matrices in R.
7. Explain about head(), tail() and names().
8. Explain the concept of subsetting data frames in R.
9. Explain the process of reading XML files into R.
10. Explain the process of reading Excel files into R.

(507BCO21)

ASSIGNMENT-2

B.A.(Computer)&B.COM(Computer) DEGREE EXAMINATION, SEPTEMBER-2024

Third Year - Fifth Semester

Computer Applications

Paper VII – BIG DATA ANALYTICS USING R

MAXIMUM MARKS-30

ANSWER ALL QUESTIONS

1. Explain the concept of business intelligence (BI). Compare and contrast business intelligence (BI) with big data.
2. Define big data and explain its evolution over time. Why to use big data?
3. Discuss the classification of big data analytics.
4. Explain the technologies needed to meet the challenges of big data analytics.
5. Discuss common data types used in R.
6. Explain the concepts of control structures in R.
7. Explain the functionalities of the following functions: `dim()`, `nrow()`, `ncol()`, `str()`, `summary()`.
8. Explain the process of loading data frames into R.
9. How is R used in data visualisation?
10. Compare and contrast reading JSON files and reading data from databases in R.

(509BCO21)

ASSIGNMENT-1

B.A.(Computer)&B.COM(Computer) DEGREE EXAMINATION, SEPTEMBER-2024

Third Year - Fifth Semester

Computer Applications

Paper VII - DATA SCIENCE USING PYTHON

MAXIMUM MARKS-30

ANSWER ALL QUESTIONS

1. What are the primary responsibilities of a data scientist in an organisation?
2. Explain the importance of data science.
3. Explain about arithmetic operators in python.
4. Explain about break and pass statements in python.
5. Explain about tuple data structure.
6. Explain about dictionaries in Python.
7. Discuss the concepts of lambda functions and their use in Python.
8. Explain the concept of recursive functions in Python.
9. Discuss the built-in class attributes in Python.
10. Explore the concept of static methods in Python classes.

(509BCO21)

ASSIGNMENT-2

B.A.(Computer)&B.COM(Computer) DEGREE EXAMINATION, SEPTEMBER-2024

Third Year - Fifth Semester

Computer Applications

Paper VI - DATA SCIENCE USING PYTHON

MAXIMUM MARKS-30

ANSWER ALL QUESTIONS

1. Describe the key steps involved in the process of data science.
2. Justify why Python is a preferred programming language for data science.
3. Discuss the different types of decision-making statements in Python.
4. Elaborate on the concept of looping statements in Python.
5. Discuss the various methods available for manipulating lists in Python.
6. Explain how string accessing, slicing operations work in Python. Also explain about basic operations on strings.
7. Discuss the modules "math" and "random" in Python.
8. Discuss the steps involved in defining and calling a function in Python. Explain types of functions. Explain with examples.
9. Explain the concepts of classes and objects in object-oriented programming. Provide an example.
10. (a) Define private methods in Python classes.
(b) Explain the significance of the "self" argument.
