Vegetarians do not eat meat, poultry or fish but they do eat eggs and dairy products. Vegans, however, eat foods of plant origin only. They do not take milk or milk products. Avoiding animal foods like this can lead to mineral and vitamin deficiencies, poor iron absorption and lack of calcium. A high-fibre diet can protect us against several diseases of the gut.

Most of us take life for granted. We know that one day we must die but usually we picture that day as far in the future. When we are in good health, death is all but unimaginable. We seldom think of it. The days stretch out in an endless vista. So we go about our petty tasks hardly aware of our listless attitude towards life. The same lethargy, I am afraid characterizes the use of all our faculties and senses. Only the deaf appreciate hearing, only the blind realize the manifold blessings that lie in sight. Particularly does this observation apply to those who have lost sight and hearing in adult life. But those who have never suffered impairment of sight or hearing seldom make the fullest use of these blessed faculties. Their eyes and ears take in all the sights and sounds hazily without concentration and with little appreciation. It is the same old story of not being grateful for what we have until we lost it, of not being conscious of health until we are ill.
