**M.Sc. – Botany - Program code: 01**

**Program Structure**

| Program code      | Program  | Internal assessment | External exams | Max. Marks | credits |
|-------------------|--|---------------------|----------------|------------|---------|
| <b>SEMISTER 1</b> |  |                     |                |            |         |
| 101BO24           | Plant Systematics  | 30                  | 70             | 100        | 4       |
| 102BO24           | Reproductive Biology of Angiosperms  | 30                  | 70             | 100        | 4       |
| 103BO24           | Biology and Diversity of Viruses, Bacteria, Algae and Fungi  | 30                  | 70             | 100        | 4       |
| 104BO24           | Outlines of Bryophytes, Pteridophytes, Gymnosperms and Plant Fossils   | 30                  | 70             | 100        | 4       |
| 105BO24           | Plant Systematics and Reproductive Biology of Angiosperms  | 30                  | 70             | 100        | 4       |
| 106BO24           | Biology and Diversity of Viruses, Bacteria, Algae, and Fungi and Outlines of Bryophytes, Pteridophytes Gymnosperms and Plant Fossils | 30                  | 70             | 100        | 4       |
| <b>SEMISTER 2</b> |  |                     |                |            |         |
| 201BO24           | Plant Ecology and Biodiversity   | 30                  | 70             | 100        | 4       |
| 202BO24           | Plant Physiology   | 30                  | 70             | 100        | 4       |
| 203BO24           | Compulsory Foundation – Cell Biology   | 30                  | 70             | 100        | 4       |
| 204BO24           | Plant Structure and Development  | 30                  | 70             | 100        | 4       |
| 205BO24           | Plant Ecology and Biodiversity and Plant Physiology  | 30                  | 70             | 100        | 4       |
| 206BO24           | Cell Biology and Plant Structure and Development   | 30                  | 70             | 100        | 4       |
| <b>SEMISTER 3</b> |  |                     |                |            |         |
| 301BO24           | Plant Pathology  | 30                  | 70             | 100        | 4       |
| 302BO24           | Plant Metabolism   | 30                  | 70             | 100        | 4       |
| 303BO24           | Ethnobotany and Ethnomedicine  | 30                  | 70             | 100        | 4       |
| 304BO24           | Molecular Biology of Plants  | 30                  | 70             | 100        | 4       |
| 305BO24           | Plant Pathology and Plant Metabolism   | 30                  | 70             | 100        | 4       |
| 306BO24           | Ethnobotany and Ethnomedicine and Molecular Biology of Plants  | 30                  | 70             | 100        | 4       |
| <b>SEMISTER 4</b> |  |                     |                |            |         |
| 401BO24           | Plant cell, Tissue and Organ Culture   | 30                  | 70             | 100        | 4       |
| 402BO24           | Genetic engineering and Bioinformatics   | 30                  | 70             | 100        | 4       |
| 403BO24           | Cytogenetics and Plant Breeding  | 30                  | 70             | 100        | 4       |
| 404BO24           | Horticulture and Landscaping   | 30                  | 70             | 100        | 4       |
| 405BO24           | Plant cell, Tissue and Organ Culture and Genetic engineering and Bioinformatics  | 30                  | 70             | 100        | 4       |
| 406BO24           | Cytogenetics and Plant Breeding and Horticulture and Landscaping   | 30                  | 70             | 100        | 4       |

  
**Prof. A. Amrutha Valli**  
 M.Sc., Ph.D. FAPS, AFAPAS  
 Department of Botany & Microbiology  
 ACHARYA NAGARJUNA UNIVERSITY  
 Guntur - 522 510, A.P. INDIA

**SEMESTER-I**  
**M Sc BOTANY**  
**101BO24-PLANT SYSTEMATICS**

**UNIT-I**

1. Systematics: Concepts and basic components;
2. Taxonomic structure; Taxonomic hierarchy- species to division;
3. International Code of Nomenclature (ICN) of algae, fungi and plants -
4. Principles, Rules and Recommendations, Ranks, Principle of Priority, Typification, Author citation, Effective and Valid publication.

**UNIT-II**

1. System of classification of Armen Takhtajan and its merits and demerits;
2. Angiosperm Phylogeny Group (APG) classification;
3. A brief account of selective clades like Basal angiosperms, Magnoliids, Monocots (including Commelinids),
5. A brief account of selective clades like Eudicots, Rosids, Asterids.

**UNIT-III**

1. Taxonomic evidence: Morphology, Anatomy, Embryology, Palynology and Cytology in relation to taxonomy;
2. Data information systems;
3. Botanical Survey of India (BSI): Objectives, activities, organization and publications.

**UNIT-IV**

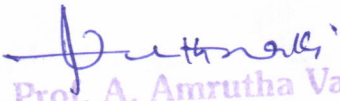

1. Process of Plant Identification: Construction, types and use of Taxonomic keys;
2. Herbarium methodology: Collection of plants, processing and preservation of specimens;
4. mportant World and Indian herbaria;
5. Major botanical gardens of the World and India;
6. DNA barcoding in plants and its practical implications.

**UNIT-V**

1. Chemosystematics: Primary and Secondary metabolites, Semantides and Non-semantides etc. in plants;
2. Phylogenetic Systematics: operational units, characters, coding and construction of cladograms;
3. Serosystematics: Methodology and its applications in systematics;
4. Molecular Systematics: Gene sequences, Phylogenetic analysis, Restriction site analysis, allozymes etc.

## **SEMESTER-I**

### **M Sc BOTANY**

#### **102BO24-REPRODUCTIVE BIOLOGY OF ANGIOSPERMS**

##### **UNIT-I**

1. Historical account of Plant Reproduction.
2. Floral differentiation: Inflorescence and floral meristem, mutations affecting floral differentiation.
3. Male Gametophyte: Structure of anther, microsporogenesis, role of tapetum; pollen development; formation of vegetative and generative cells; pollen sterility; abnormal features of pollen.
4. Female gametophyte: Types of ovule, megasporogenesis, special features. Types of female gametophytes and their development, ultra structure of mature embryo sac; haustorialbehaviour of embryo sac, nutrition of embryo sac.

##### **UNIT-II**

1. Pollination: Pollen transfer, pollination mechanisms and vectors. Structure of style and stigma; pollen-pistil interaction.
2. Fertilization: Pollen germination and pollen-tube growth, path of pollen-tube, pollentube discharge; double fertilization.
3. Endosperm: Types of endosperms, cytology and functions of endosperm.

##### **UNIT-III**

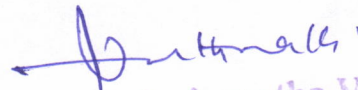

1. Embryogenesis: Gene expression during embryogenesis.
2. Embryogeny in dicots and monocots.
3. Underdeveloped and reduced embryos; Nutrition of embryo.
4. Polyembryony: Causes of polyembryony, experimental induction of polyembryony, classification of polyembryony and its practical applications..

##### **UNIT-IV**

1. Apomixis: Vegetative reproduction, apospory, causes of apomixis, significance of apomixis.
2. Embryology in relation to Taxonomy:Importance of embryological characters in taxonomic. considerations, families with special embryological features.
3. Role of palynology in taxonomy.

##### **UNIT-V**

1. Experimental Embryology: Embryo culture: Embryo rescue, embryo culture,

  
**Prof. A. Amrutha Valli**  
M.Sc., Ph.D. FAPS, AFAPAS  
Department of Botany & Microbiology  
ACHARYA NAGARJUNA UNIVERSITY  
Guntur - 522 510, A.P. INDIA

2. microsurgical experiments and applications.
3. Somatic embryogenesis: Direct and indirect somatic embryogenesis, embryoids,
4. synthetic seeds, practical applications of somatic embryogenesis.
5. Endosperm culture: The technique of endosperm culture, histology and cytology of callus, triploid production and their practical applications.

**Prof. A. Amrutha Valli**  
 M.Sc., Ph.D. FAPS, AFAPA  
 Department of Botany & Microbiology  
 ACHARYA NAGARJUNA UNIVERSITY  
 Guntur - 522 510, A.P. INDIA

**SEMESTER-I**  
**M Sc BOTANY**  
**103BO24- BIOLOGY AND DIVERSITY OF VIRUSES, BACTERIA,**  
**ALGAE AND FUNGI**

**UNIT-I**

1. Brief account of discovery of viruses; general properties.
2. Structure, cultivation, and purification of viruses
3. Transmission of viruses.
4. Brief account of bacteriophages and plant viruses; Economic importance.

**UNIT-II**

1. Morphology and ultra structure of bacteria.
2. Nutritional types (autotrophs and heterotrophs); Growth of Bacteria;
3. Recombination in bacteria (transformation, transduction and conjugation);
4. General characters of Actinomycetes, Archaeobacteria, Mycoplasmas and Cyanobacteria; Economic importance.

**UNIT-III**

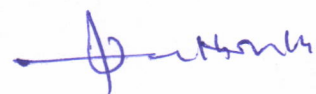

1. Distribution and thallus organization,
2. Classification and economic importance of algae;
3. Brief account of Chlorophyceae, Rhodophyceae, Phaeophyceae, and
4. Bacillariophyceae.
5. Algae as primary producers and commercial products. Algae as SCP. Algal blooms and toxins.

**UNIT-IV**

1. General characters and Nutrition of Fungi
2. Reproduction of fungi;
3. Classification of Fungi (Ainsworth system);
4. Brief account of Zygomycotina, Ascomycotina, Basidiomycotina and Deuteromycotina.

**UNIT-V**

1. Ecto and endomycorrhizal associations;
2. Edible and poisonous mushrooms,
3. Mushroom cultivation;
4. Importance of Fungi in Agriculture and industry and Mycotoxins.

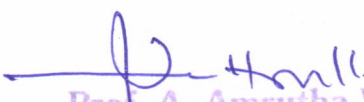

**Prof. A. Amrutha Valli**  
M.Sc., Ph.D. FAPS, AFAPAS  
Department of Botany & Microbiology  
ACHARYA NAGARJUNA UNIVERSITY  
Guntur - 522 510, A.P. INDIA

### TEXTBOOKS:

- 1) An Introduction to Fungi: by Webster, J. (1985). Cambridge Univ. Press.
- 2) Brock Biology of Microorganisms: by Madigan, Mordinko and Parker (2000).
- 3) Prentice Hall.
- 4) Introduction to Plant Viruses: by Mandahar. C.I. (1978). Chand & Co., New Delhi.
- 5) Introductory Phycology by Kumar, H.D. (1988). Affiliated East-West Press. Ltd,
- 6) New Delhi.
- 7) An Introduction to the Algae by Morris. J. (1986). Cambridge University' Press,
- 8) U.K
- 9) Microbiology: by Prescott, L.M., Harley, J.P. and Klein, D.A. (1992), WCB
- 10) Publishers.
- 11) Introductory Mycology: by Alexopoulos, C.J. Mims, C.W. and Blackwell, M.
- 12) (1996). John Wiley & Sons.
- 13) The Biology of Algae by Round. F.E. (1986). Cambridge University Press. U.K.

  
**Prof. A. Amrutha Valli**  
M.Sc., Ph.D. FAPS, AFA  
Department of Botany & Microbiology  
ACHARYA NAGARJUNA UNIVERSITY  
Guntur - 522 510, A.P. INDIA

## **SEMESTER-I**

### **M Sc BOTANY**

#### **104BO24- OUTLINES OF BRYOPHYTES, PTERIDOPHYTES, GYMNOSPERMS AND PLANT FOSSILS**

##### **UNIT-I**

1. Classification, general characters, range of thallus organization and reproduction in Hepaticopsida,
2. Classification, general characters, range of thallus organization and reproduction in Anthocerotopsida
3. Classification, general characters, range of thallus organization and reproduction in Bryopsida.
4. Evolutionary trends in gametophytes and sporophytes of Bryophytes.

##### **UNIT-II**

1. General characteristics and classification of pteridophytes;
2. Study of morphology, anatomy and reproduction of Psilopsida, Psilotopsida,
3. Lycopsida, Sphenopsida and Pteropsida.
4. Origin and phylogeny of pteridophytes.
5. 1.4.2.4 Evolution of stele in Pteridophytes. Heterospory and seed habit in pteridophytes.

##### **UNIT-III**

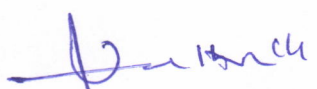

1. Classification, distribution and economic importance of Gymnosperms.
2. Structure and reproduction in living (modern) Cycads, Coniferopsida and Gnetopsida.
3. Wood of gymnosperms;
4. Male and female gametophytes of gymnosperms.

##### **UNIT-IV**

1. Principles of Paleobotany; Geological time scale;
2. Determination of age of plant fossils; process of fossilization; types of fossils;
3. Comprehensive account of fossil algae, fossil bryophytes,
4. Fossil pteridophytes and gymnosperms.

##### **UNIT-V**

1. Ecological, economic, evolutionary and industrial applications of Bryophytes,

  
**Prof. A. Amrutha Valli**  
M.Sc., Ph.D. FAPS, AFAPAS  
Department of Botany & Microbiology  
ACHARYA NAGARJUNA UNIVERSITY  
Guntur - 522 510, A.P. INDIA

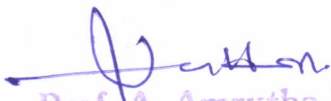

2. Ecological, economic, evolutionary and industrial applications of Pteridophytes,  
1.4.5.3 Ecological, economic, evolutionary and industrial applications of  
Gymnosperms
3. Plant Fossils. Recent trends and model plants from Bryophyte and Pteridophyte  
plants.

**ACHARYA NAGARJUNA UNIVERSITY: NAGARJUNA NAGAR  
CENTRE FOR DISTANCE EDUCATION**

**Master of Sciences (BOTANY) Programme CODE:01**

**Course: M.Sc. Botany (Practical) Semester: 01**

**105BO24: Plant Systematics and Reproductive Biology of Angiosperms**

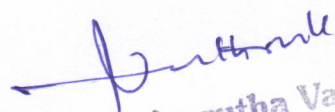

**Practical Syllabus**

**Plant systematics Laboratory Exercises:**

1. Description of specimens from locally available representative families.
2. Description of a genus based on 3-4 different species.
3. Identification of plant specimens using floras and identification keys.
4. Preparation of identification keys for at least 10 specimens based on morphological features.
5. Study of herbarium specimens of different families covered in theory course.

**Reproductive Biology of Angiosperms Laboratory exercises**

1. To study the permanent slides of different types ovules,
2. To study the T.S of Tetralobed dithecous anther and Bilobed monothecous anther
3. To study the permanent slides of different types of embryosacs
4. To study the permanent slides of Dicot embryo and monocot embryo
5. To perform Pollen viability test.

**CENTRE FOR DISTANCE EDUCATION**

**Master Of Sciences (BOTANY) Programme CODE:01**

**Course: M.Sc. Botany (Practical) Semester :01**

**106 BO24: Biology and Diversity of Viruses, Bacteria, Algae, and Fungi and Outlines of Bryophytes, Pteridophytes Gymnosperms and Plant Fossils**

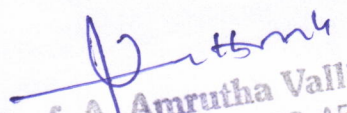

**Practical Syllabus**

**Diversity of Bacteria Virus Algae and Fungi - Laboratory Exercises:**

1. To study bacteria by using Gram's staining method.
2. Demonstration of the presence of nitrogen fixing organisms (*Rhizobium* sp.) and their isolation from root nodules of legumes.
3. Learning the methods of sterilization, media preparation and inoculation techniques of bacteria
4. Algal collection from different habitats and their identification.
5. Morphological and reproductive stages of some genera of Cyanophyta, Chlorophyta, Xanthophyta, Pheophyta and Rhodophyta.
6. Morphological studies and identification of the fungi through temporary and permanent mounts as mentioned in syllabus.

**Biology and Diversity of Bryophytes and Pteridophytes: Laboratory Exercises:**

1. Study of morphological and anatomical details of vegetative and reproductive structures of the Bryophytes as mentioned in the syllabus through specimens, temporary and permanent slides.
2. Study of morphological and anatomical details of vegetative and reproductive structures of the Pteridophytes as mentioned in the syllabus through specimens, temporary and permanent slides.
3. Study of important fossil Pteridophytes from permanent slides.
4. Study of morphology and anatomy of vegetative and reproductive parts of different genera as mentioned in theory syllabus. 3. Prepare the permanent slides to study the anatomical details of different Gymnospermic woods.
5. Study of important fossil Gymnosperms with the help of permanent slides.

**SEMESTER-2**  
**M Sc BOTANY**  
**201BO24- PLANT ECOLOGY AND BIODIVERSITY**

**UNIT-I**

Levels of Ecological Organization; Population characteristics and dynamics; Communities characteristics and their analysis; Structure and function of ecosystem; Energy flow in ecosystem; Homeostasis of ecosystem; Biomes and their types.

**UNIT-II**

Soils: Soil properties and types of soils; Global biogeochemical cycles of Carbon and Sulfur; Dynamic Phytogeography: Basic principles, Age and area theory; Centre of origin; Endemism, Migration and Continental drift.

**UNIT-III**

Biodiversity: Current concepts, Levels of Biodiversity like Species, Ecosystem and Genetic diversities, IUCN categories of threat; Causes of biodiversity loss; Keystone species; Biodiversity hotspots of India and world; Organizations involved in biodiversity conservation: IUCN, WWF, UNEP and UNESCO.

**UNIT-IV**

Strategies for *in situ* conservation: Protected areas: Sanctuaries, National Parks, Biosphere Reserves and Mangroves; Strategies for *ex situ* conservation: Botanical Gardens, Seed Banks, Field Banks, Gene Banks, *in vitro* preservation;

**UNIT-V**

Air pollution and climate change; Sustainable development; Phytoremediation; Application of Remote sensing and Geographical Information System (GIS) in biodiversity studies.

 Department of Botany & Microbiology  
 ACHARYA NAGARJUNA UNIVERSITY  
 Guntur - 522 510, A.P. INDIA

**SEMESTER-2**  
**M Sc BOTANY**  
**202BO24- PLANT PHYSIOLOGY**

**UNIT - I**

Membrane transport and translocation of water and solutes: The structure and properties of water; water transport processes (diffusion, bulk flow, osmosis, water potential, components of water potential); Mechanism of water transport through xylem; Solute transport by active and passive mechanisms. Structure and properties of membrane transport proteins.

**UNIT - II**

Water loss by transpiration; Mechanism of stomatal movements; antitranspirants. Sensory Photobiology: Historical discovery of phytochromes, structure and function of phytochrome, photochemical and biochemical properties of phytochrome, phytochrome induced plant responses, molecular mechanism of action of phytochrome in gene expression, Cryptochrome and its role in photomorphogenesis.

**UNIT - III**

The flowering process- Photoperiodism and its significance, initiation of flower primordia, flowering stimulus, vernalization, endogenous clock and its regulation. Plant growth regulators: Physiological effects and mode of action of auxins, gibberellins, cytokinins, ethylene, abscisic acid, brassinosteroids, jasmonic acid and salicylic acid.

**UNIT-IV**

Signal transduction: Over view, receptors and G proteins, second messengers, two component sensor regulator system in bacteria and plants, signal transduction and gene expression. Essential nutrients, deficiencies and plant disorders.

**UNIT - V**

Stress Physiology: Water stress, salt stress, temperature stress (HSP), biotic stress (HR and SAR), heavy metal stress; Stress avoidance and tolerance mechanisms; Structural, physiological, biochemical and molecular responses of plants to environmental stress; Reclamation of saline and heavy metal contaminated soils.

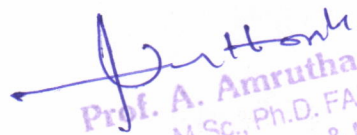

**REFERENCE BOOKS:**

**SEMESTER-2**  
**M Sc BOTANY**  
**203BO24- CELL BIOLOGY**

**UNIT- I**

Eukaryotic cell : Organelles – Chloroplast, Mitochondria, Ribosomes, Endoplasmic reticulum, Peroxisomes, Golgi apparatus, Lysosomes and plant vacuoles and Cytoskeleton.

**UNIT- II**

Nucleus; Ultrastructure of prokaryotic and eukaryotic chromosome; chromosome banding; Karyotype; Euchromatin and heterochromatin. Special types of Chromosomes: Polytene, Lamp-brush, B-chromosomes, and Sex- chromosomes,

**UNIT- III**

Phases of Cell cycle: G1, S, G2 and M phases, Check points in cell cycle - Role of cyclins; Cyclin dependent kinases; Cell division; significance of meiosis.

**UNIT- IV**

Apoptosis –mechanism and significance , oncogene and tumour suppressor genes. Genomes of mitochondria and chloroplasts. Endosymbiotic theory.

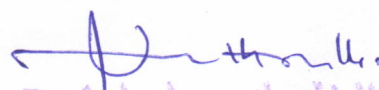

**UNIT-V**

Structural alteration in chromosomes - Origin, Duplications, Deletions, Inversions and Translocations.

Numerical alteration in chromosomes: Origin, Occurrence of haploids, polyploids and aneuploids.

## SEMESTER-2

### M Sc BOTANY

#### 204BO24- PLANT STRUCTURE AND DEVELOPMENT

##### UNIT-I

Types and functions of meristems, organization and regulation of Shoot Apical Meristem (SAM) and Root Apical Meristem (RAM), floral meristems and MADS-Box genes.

##### UNIT-II

Structure and function of vascular cambium; wood- heart wood and sap wood, porous and nonporous wood, reaction wood; secondary growth in Dicots and Monocots; Anomalous secondary growth in Dicots and Monocots; structure and functions of simple and complex tissues.

##### UNIT-III

Structure and development of leaf, stomata, nodes their and evolution; special anatomical adaptations of Kranz and CAM anatomy features.

##### UNIT-IV

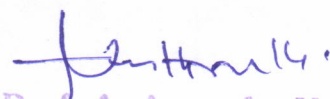

Plant embryo development, stages, cell division and pattern formation in embryo, cell polarity In embryo, genetic and hormonal regulation of embryo development. Seed germination and factors influencing the germination and seedling growth.

##### UNIT- V

Seed Dormancy- types, factors causing seed dormancy, mechanism of breaking seed dormancy, Programmed Cell Death (PCD); Senescence types and biochemical changes associated with leaf senescence; applications of anatomy in taxonomy and pharmacognosy.

ACHARYA NAGARJUNA UNIVERSITY  
Guntur - 522 510, A.P. INDIA

**SEMESTER-3**  
**M Sc BOTANY**  
**301BO24- PLANT PATHOLOGY**

**UNIT-I**

Concept of disease in plants; Definitions of plant disease; Historical development of Plant Pathology. Methods of studying Plant disease; collection, preservation, isolation of pathogens and proving Koch postulates. Symptoms caused by plant pathogenic fungi, bacteria and viruses. Classification of plant diseases.

**UNIT-II**

Entry of pathogens into the host. Role of enzymes, toxins and phytoalexins in plant pathogenesis. Physiological changes in diseased plants. Plant disease forecasting.

Genetics of disease resistance.

**UNIT-III**

Detailed study of symptoms, etiology, epidemiology and control of the following fungal diseases of plants; late blight of potato, *Taphrina* leaf spot of turmeric, powdery mildew of cucurbits, black stem rust of wheat, blast of rice, tikka disease of groundnut, red rot of sugarcane.

**UNIT-IV**

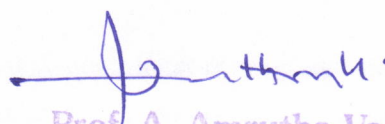

Detailed study of the following bacterial and viral diseases: bacterial leaf blight of rice, angular leaf spot and black arm of cotton, citrus canker, tobacco mosaic disease.

**UNIT-V**

Principles of plant disease control: Plant quarantine, seed treatment, cultural practices chemical control, development of disease resistant varieties. Biological control of plant diseases. Integrated Pest Management - concept, system, benefits and limitations.

**TEXT BOOKS:**

- 1) Agrios, G.N. 1997. Plant Pathology, Academic Press, London.
- 2) Tar, S.A.J. 1972. Principles of Plant Pathology.
- 3) Singh, R.S. 1991. Plant diseases, 6<sup>th</sup>Edn., Oxford & IBH Co., New Delhi.
- 4) Singh, R.S. 1988. Principles of Plant Pathology, 3<sup>rd</sup>Edn., Oxford & IBH Co.,
- 5) New Delhi.
- 6) Mehrotra, R.S. 1980. Plant Pathology, Tata-McGraw Hill Publishing Company,
- 7) New Delhi.
- 8) Rangaswami, G. and Mahadevan, A. 1999. Diseases of Crop Plants in India, 4<sup>th</sup>
- 9) Edition, Printice Hall of India Publications.

**Prof. A. Amrutha Valli**  
M.Sc., Ph.D. FAPS, AFAPAS  
Department of Botany & Microbiology  
ACHARYA NAGARJUNA UNIVERSITY  
Guntur - 522 510, A.P. INDIA

**SEMESTER-3**  
**M Sc BOTANY**  
**302BO24- PLANT METABOLISM**

**UNIT-I**

Energy and Enzymes: Energy flow through living systems, principles of the thermodynamics, free energy and chemical potential, free energy of oxidation–reduction reactions, redox potential, types of phosphorylations, structure and functions of ATP. Enzymes: General aspects, nomenclature and classification of enzymes, mode of enzyme action, Michaelis – Menton equation and its significance, regulation of enzymes, enzymes inhibition and isoenzymes.

**UNIT-II**

Photochemistry and Photosynthesis: General concepts of photosynthesis, photosynthetic pigments, structure of photosynthetic apparatus, photosynthetic electron transport (Non-cyclic, cyclic), proton transport and ATP synthesis. Carbon assimilation: The carbon cycle, photorespiration and its significance, C<sub>4</sub> and CAM pathways and their physiological and ecological significance. Biosynthesis of starch and sucrose, translocation by phloem, phloem loading and unloading.

**UNIT-III**

Respiration: Over view of plant respiration, glycolysis, pentose phosphate pathway, TCA cycle, electron transport chain (ETC), chemiosmotic hypothesis of ATP synthesis, alternative oxidase system, Alcohol and Lactic acid fermentations.

**UNIT-IV**

Nitrogen metabolism: Sources of nitrogen to plants, biological nitrogen fixation, nodule formation and nod-factors, mechanism of nitrate uptake and reduction, ammonium assimilation (reductive amination, transamination and GS-GOGAT).

Sulfate metabolism: Uptake, transport and assimilation.

**UNIT-V**

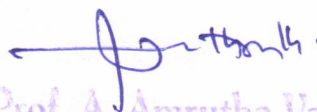

Lipid metabolism: Structure and function of lipids, classification of lipids, fatty acids and their biosynthesis. Synthesis of phospholipids and storage lipids; catabolism of lipids; glyoxylate cycle.

  
**Prof. A. Amrutha Valli**  
M.Sc., Ph.D. FAPS, AFAPS

## **SEMESTER-3**

### **M Sc BOTANY**

#### **304BO24- MOLECULAR BIOLOGY OF PLANTS**

##### **UNIT-I**

Evidence for DNA as genetic material, physical and chemical structure of DNA, mechanism of DNA replication, DNA damage and DNA repair mechanisms. C value and C value paradox. Cot curves.

##### **UNIT-II**

Transcription in prokaryotes and Eukaryotes, mRNA processing and other RNA processing events, mechanism of Translation, RNA splicing, genetic code, protein biosynthesis. Protein sorting and targeting of proteins to the organelles.

##### **UNIT-III**

Principles of gene regulation in prokaryotes (lactose and tryptophan operons), role of chromatin remodeling and DNA methylation in gene regulation. Transposons, mechanism of transposition and genetic consequences of transposition. Cis-acting and trans-acting factors in eukaryotic gene regulation.

##### **UNIT-IV**

RNA Biology and Genome editing: RNA world hypothesis. Small RNA (Micro RNA) mediated transcriptional and translational regulation. Gene knock-down using RNAi. TALENS, ZFNs and CRISPR-CAS9 based genome editing technologies. Applications of Genome Editing Technologies in plant biology.

##### **UNIT-V**

Next generation DNA sequencing methods. Atomic Force Microscopy, Cryo-EM and Confocal Microscopy. Principles and types of electrophoretic techniques. LC-MS, and Labeled tracers.

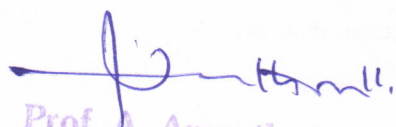

##### **REFERENCE BOOKS:**

## SEMESTER-4

### M Sc BOTANY

## 401BO24- PLANT CELL, TISSUE AND ORGAN CULTURE

### UNIT-I

Plant tissue culture laboratory organization and requirements. Various explant and non-explant sterilization techniques. Tissue culture media: Composition and preparation of different types of media.

### UNIT-II

Basic concept of regeneration: Concept of Cellular Totipotency and Differentiation. Fundamental aspects of Morphogenesis. Organogenesis- direct & indirect. Role of plant growth regulators and factors governing *in vitro* behavior of cultures.

### UNIT-III

Propagation and variation: stages and applications of micropropagation. Photoautotrophic micropropagation and acclimatization of tissue culture plants. Production of pathogen free plants and their application. Somatic embryogenesis, role of physical and chemical factors in the induction of synthetic seed-production and their uses. Somaclonal variations and their applications.

### UNIT-IV

Somatic hybridization: Protoplast isolation, fusion and culture, selection and characterization of hybrids. Symmetric, asymmetric hybrids and cybrids, significant achievements and limitations of Protoplast research, production of test tube plants. Callus and embryo culture, production of seedless fruits.

### UNIT-V

Applications of plant tissue culture: production of haploids and its significance in crop improvement. Secondary metabolite production through cell and organ culture (Hairy roots). Cryopreservation and conservation of Germplasm. Gene Banks.

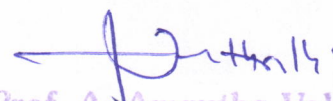

### TEXT BOOKS

- 1) Bhojwani, S.S. and Razdan, M.K. 1996. Plant Tissue Culture: Theory and Practice (a revised edition). Elsevier Science Publishers, New York, USA.

Department of Botany & Microbiology

ACHARYA NAGARJUNA UNIVERSITY

Guntur - 522 510, A.P. INDIA

## SEMESTER-4

### M Sc BOTANY

#### 409BO24- GENETIC ENGINEERING AND BIOINFORMATICS

##### UNIT-I

Recombinant DNA technology: Tools and methods involved in generating r-DNA molecules, gene cloning-techniques, and identification of clones by screening procedures,

##### UNIT-II

Construction and screening of genomic and c-DNA libraries; PCR, types and its applications; Principles, types and applications of Blotting techniques.

##### UNIT-III

Genetic Engineering of plants: Plant transformation with Ti-plasmid of *Agrobacterium tumefaciens*, physical methods of transferring genes to plants, reporter genes and use of different promoters. Transgenic plants. Bio-safety and Bio-ethical issues of GM crops, and IPRs.

##### UNIT-IV

Bioinformatics: definition, introduction, scope and applications. Databases – CBI GenBank, PDB, OMIM, EMBL. Literature Databanks – Pub Med, Med line. Sequence Alignment based on Matrices (BLOSUM and PAM), Tools for sequence alignment – BLAST, FASTA. Pair wise and Multiple sequence alignment and phylogenetic analysis.

##### UNIT-V

The biological databases and types; Sequence databases; Structural databases; Prediction of genes and gene function. Translation of gene into protein; Protein secondary structure prediction; Prediction of domains, motifs and profiles of proteins.

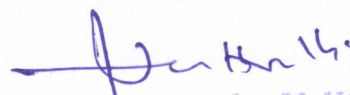

##### REFERENCE BOOKS

ACHARYA NAGARJUNA UNIVERSITY  
Guntur - 522 510, A.P. INDIA

**SEMESTER-4**  
**M Sc BOTANY**  
**403BO24- CYTOGENETICS AND PLANT BREEDING**

**UNIT-I**

Principles of plant breeding- Objectives and achievements; Breeding methods in clonally propagated, self-pollinated and cross-pollinated crops; Selection-types of selection and significance; Hardy-Weinberg Law.

**UNIT-II**

Plant genetic resources and centers of origin; Heterosis- theories and importance; Hybridization-types, Hybrids- production and significance; Male sterility (MS)- classification (GM, CMS, CGMS and chemically induced MS) and its importance in breeding; Polyploidy-types, polyploidy breeding and its significance.

**UNIT-III**

Mutation breeding- mutation types, mutagens, procedure and significance of mutation breeding in crop improvement; Breeding methods for resistance- to biotic (Fungi, Viruses, Insect and Pests) and abiotic (Drought and Salt) stresses.

**UNIT-IV**

Markers - Morphological, biochemical and molecular (RFLP, RAPD) markers and their applications in plant breeding; Marker assisted selection (MAS); Molecular maps- Genetic and physical maps, QTL maps and linkage maps. National and International plant organizations associated with crop improvement programmes.

**UNIT-V**

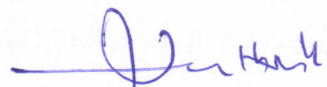

Molecular Cytogenetics - FISH, GISH, Flow Cytometry and applications of molecular Cytogenetics; Microdissection and Microcloning techniques. Introduction to statistical constants- Mean, Mode, Median, Variance, Standard Deviation and Standard Error, Normal distribution curve, ANOVA, Students t-test and F-test.

Guntur - 522 510, A.P. INDIA

**SEMESTER-4**  
**M Sc BOTANY**  
**404BO24- HORTICULTURE AND LANDSCAPING**

**UNIT-I**

Importance of horticulture; Nursery and types of nursery beds; Orchard plan and systems of planting; Propagation of plants by asexual methods (cutting, layering, grafting and budding).

**UNIT-II**

Commercial floriculture: Propagation and production of flower crops like Roses, Chrysanthemum and Jasminum; Pomology: Nutritive value of fruits, Cultivation practices and production of fruit crops like Mango, Banana and Guava.

**UNIT-III**

Olericulture: Importance of vegetables in human nutrition, Types of vegetable gardens. A brief study of inter-cultivation practices of major vegetable crops of regional importance.

**UNIT-IV**

Importance and scope of landscape gardening; Principles of landscape design; Garden adornments; Garden features: Wall, Fencing, Steps, Garden drives and Paths, Hedges, Arches, Pergola, Lawn, Carpet bedding, Flower beds, Shrubbery, Borders, Rockery, Water gardens, Bonsai, Topiary; Garden types: Indoor garden, Outdoor garden; Garden styles: Formal gardens, Informal gardens and Free style gardens.

**UNIT-V**

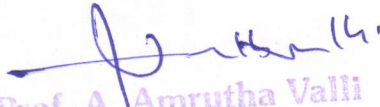

Site analysis; Elements in landscape design: Land form, Water garden furniture, Lights, Paving etc.; Study of different trees, shrubs, herbs, ground cover, indoor plants etc., suitable for landscaping and their identification; Landscaping of historical monuments and places of Tourist importance.

**TEXT BOOKS:**

- 1) Gardner V R, Bradford F C and Hooker Jr. H D, 1952. *The Fundamentals of Fruit Production*, Mac Graw Hill Book Co., New York.
- 2) Hartman H T, Kester D E, Davies, Jr, FT and Geneve R L 1976. *Plant Propagation : Principles and Practices* ( 8<sup>th</sup> Edition) . Prentice Hall, USA.
